

LG Displays for Aircraft Training Simulations

Organizational challenge

For aircraft training facilities, digital signage has become a powerful way to engage, inform and enhance training. Reliable display technology adds value to ordinary communication tactics by delivering critical information at the right moment. But procuring, deploying and supporting this technology efficiently can pose significant roadblocks for organizations.

Our solution

Insight's Connected Workforce team helps you harness the power of LG digital signage without the operational headaches. Our certified digital signage experts provide strategic guidance every step of the way — from system design to product procurement, integration, kitting, warehousing, logistics and more.

When you work with Insight Public Sector, you gain access to an expansive pool of resources, a solutions provider with deep LG expertise — and a trusted partner in the travel industry.

- 30+ years of IT experience
- 3,500+ partnerships with software, hardware & cloud providers
- 8,000+ IT consultants, technical architects & service professionals
- LG Top-Tier NSP Managed Account
- Operations in 21 countries

Benefits

- **Drive efficiencies** across the technology lifecycle with a trusted partner.
- **Mitigate risk** by practicing emergency scenarios in a safe environment.
- **Enhance engagement** in a modern, realistic training environment.
- **Refine skills** in a variety of different flight scenarios, tailored to specific goals.
- **Save on time and costs** with a more structured approach to flight training.
